## Abstract

This paper presents a structured and comprehensive dataset corresponding to the 2025 Asia Cup T20 cricket tournament, designed to facilitate data-driven research in sports analytics. The dataset comprises records from all 19 matches of the tournament and includes 61 variables covering team scores, wickets, powerplay statistics, boundary counts, toss decisions, venues, and player-specific highlights. To demonstrate its analytical value, we conduct an exploratory data analysis focusing on team performance indicators, boundary distributions, and scoring patterns. The dataset is publicly released through Zenodo under a CC-BY 4.0 license to support reproducibility and further research in cricket analytics, predictive modeling, and strategic decision-making. This work contributes an open, machine-readable benchmark dataset for advancing cricket analytics research.

## 1 Introduction

Cricket analytics increasingly relies on high-quality datasets to support statistical analysis and machine learning applications. While ball-by-ball data is available for major tournaments, openly accessible and well-documented match-level datasets for specific international competitions remain limited. The Asia Cup 2025 T20 tournament provides a valuable context for analyzing high-pressure, short-format cricket. This paper introduces the **Asia Cup 2025 Match-Level Dataset**, developed to support reproducible research in sports analytics.

## 2 Dataset Description

The dataset is distributed as a single CSV file, `asia_cup_2025_complete_dataset.csv`, containing records for all 19 matches of the tournament with 61 attributes per match.

### 2.1 Data Structure and Variables

Table 1 summarizes the major variable categories included in the dataset.

Category	Representative Variables
Match Identification	Match_Number, Date, Venue, Series
Teams	Team1, Team2, Playing_XI
Toss Information	Toss_Winner, Toss_Decision
Match Outcome	Result, Win_Margin, Player_of_the_Match
Team Performance	Total_Runs, Wickets, Overs, Extras
Powerplay Statistics	Powerplay_Runs, Powerplay_Overs
Boundary Data	Fours, Sixes
Tournament Context	Stage, Group, Match_Format

Table 1: Summary of variable categories in the Asia Cup 2025 dataset

### 2.2 Data Sources and Collection

Match data were collected from publicly available scorecards on **ESPNcricinfo** and cross-verified with official tournament information released by the **Asian Cricket Council (ACC)**. Data processing involved manual verification, standardization of entity names, and consistency checks across sources.

## 3 Exploratory Analysis

Exploratory analysis was conducted to demonstrate the analytical potential of the dataset, focusing on toss outcomes, team batting performance, and boundary distributions.

### 3.1 Toss Impact Analysis

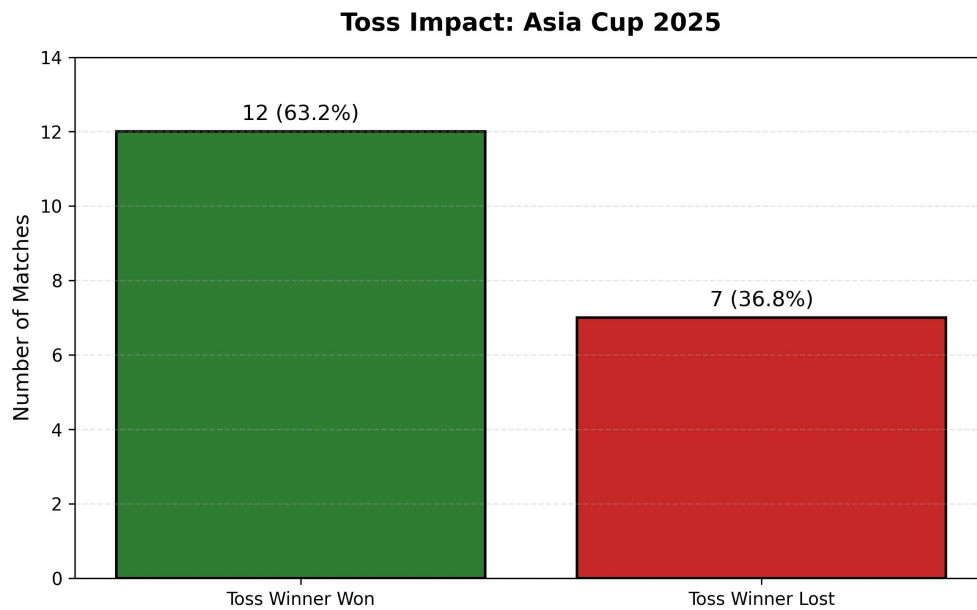

Figure 1: Impact of toss outcome on match results in the Asia Cup 2025 tournament.

### 3.2 Team Batting Performance

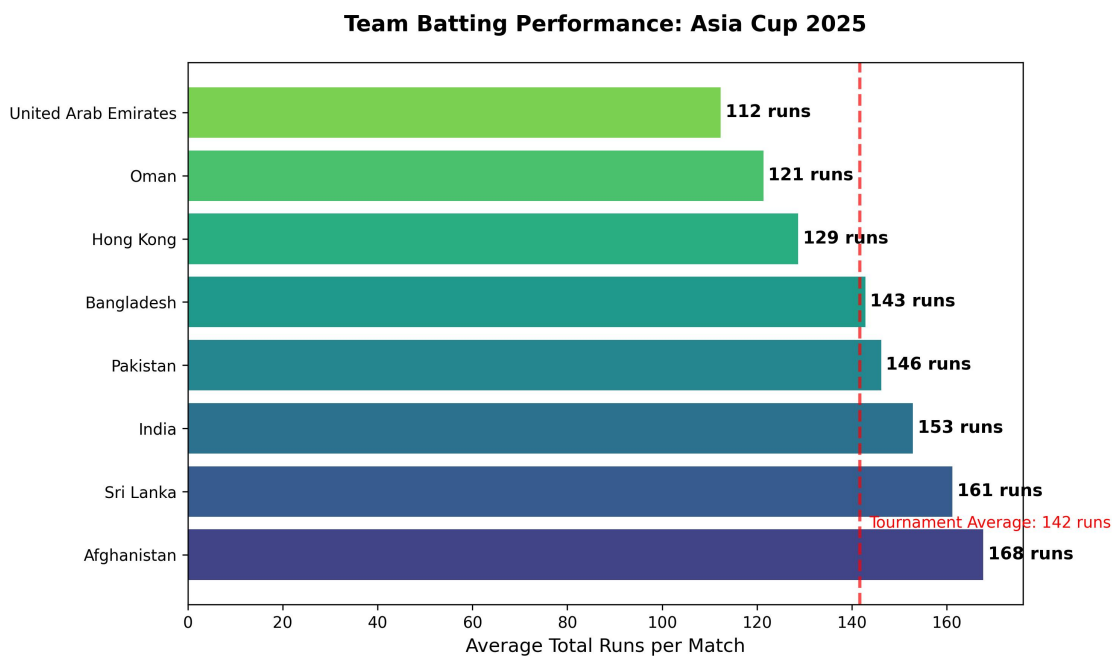

Figure 2: Average team scores across all Asia Cup 2025 matches.

### 3.3 Boundary Analysis

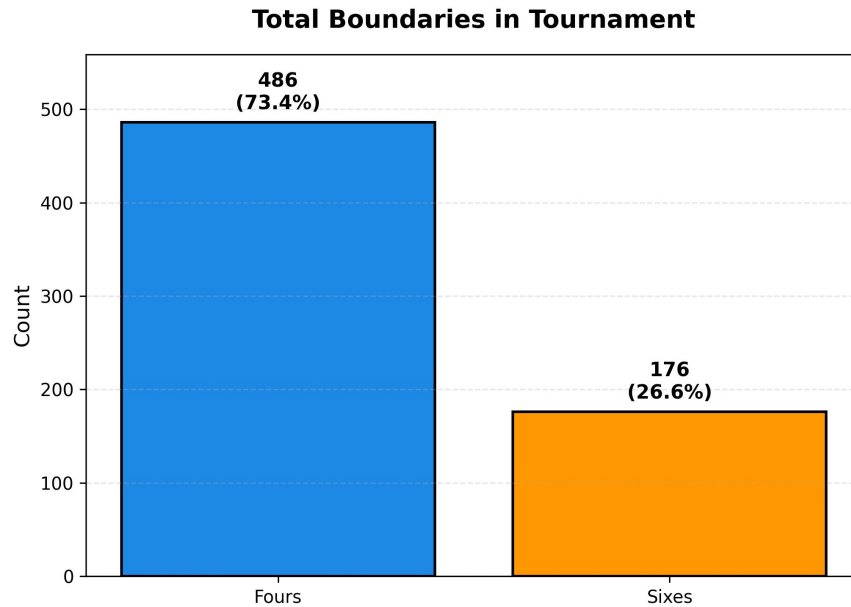

Figure 3: Distribution of fours and sixes recorded during the tournament.

## 4 Data Availability

The dataset and accompanying analysis code are publicly available:

- **Zenodo Dataset:** <https://doi.org/10.5281/zenodo.17228056>
- **GitHub Repository (EDA):** <https://github.com/kousarraza/AsiaCup2025>

## Acknowledgments

The author acknowledges **ESPNcricinfo** and the **Asian Cricket Council (ACC)** as the primary publicly available data sources used in compiling this dataset.
